

THE BETTER SHREDDER

www.wagner-shredder.com

THE BETTER SHREDDER: A GOOD CHOICE.

Wagner Shredder is your dependable and competent partner in the waste management industry. Our speciality is the construction and production of recycling machines.

We guarantee our customers a high degree of quality and flexibility, from planning to delivery and turnkey delivery of your system.

Benefit from masterfully handmade products,
Made in Austria.

Innovative and multiple award-winning
technologies.

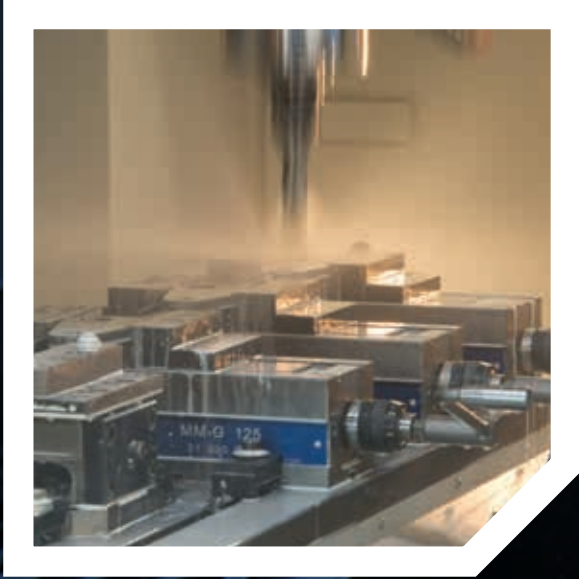

Every machine:
Long-lasting. Heavy-duty. High quality.

First-class materials and workmanship.

YOUR ADVANTAGE AT A GLANCE.

- Many years of competence and experience in engineering
- Customer-specific planning and implementation of custom complete solutions
- Everything from one source – consulting, planning, development, construction, and implementation
- A contact partner from initial meeting to turnkey delivery of the system
- Professional after sales service
- Consistent use of state-of-the-art mechanical engineering technologies
- Optimal education and further training of motivated and committed employees
- Guaranteed quality

WAGNER SINGLE SHAFT SHREDDER WAGNER TWIN SHAFT SHREDDER

Flexible use.

Robust in all variants.

Plastics, foams, textiles, Big-Bag, electrical cable scraps, paper & cardboard, wood or garbage can be processed into a defined granulate with Wagner technology.

Versatile use:

- Recycling
- Creation of substitute fuels
- Creation of regranulate
- Volume reduction
- In-house recycling
- Thermal recycling

WAGNER PERFORATORS

The perforators are used in the perforation or piercing of PET-bottles. This ensures higher density and compactness of the bottle bales.

Areas of application:

- In the sorting shaft
- In the bale pressing shaft
- On press containers

The perforators can be adapted individually to the situation at hand.

WAGNER DISMANTLER

The powerful machines separate rims from common car wheels. Tire separators are used when large quantities of tires must be separated quickly and efficiently.

Advantages:

- Easy to operate
- Powerful hydraulic system
- Robust construction
- High safety standards
- High degree of availability and long useful life

WAGNER BALE BREAKER

Various bales can be broken or opened with the bale breaker.

Advantages:

- Easy to operate
- High degree of availability with low maintenance
- Freely programmable SPS with operating display
- Easy-to-maintain tools
- High safety standards
- Long useful life

THE SUCCESS STORY

1977

Foundation of the company by Gerhard Wagner in Neuhaus am Klausenbach. In addition to traditional mechanical engineering, the focus is placed on the promising construction and production of recycling machines.

1978

Construction of the first Wagner "shredder" for the lumber and forestry industry for the production of firewood.

1985

Construction of the first quadruple-shaft shredder, for woodworking companies.

1989

Expansion of the shredder series - the first twin-shaft shredder for pre-shredding is delivered.

1992

The first Wagner single-shaft shredder - type WS 22 – is born.
The beginning of the success story – many more innovative shredder types follow.

1995

Presentation of the first "Burgenländischer Innovationspreis" (Innovation award) for the WS-series, which is followed by others.

1997

Innovation award for the bale breaker.

2002

Conversion of the individual company into WAGNER Maschinenbau GmbH (Ltd.).

2005

Innovation award for the WRD-series (Dismantler).

2007

Jubilee Year celebrating the 60th birthday of Gerhard Wagner (founder of the business) and 30 years of the Wagner Maschinenbau.

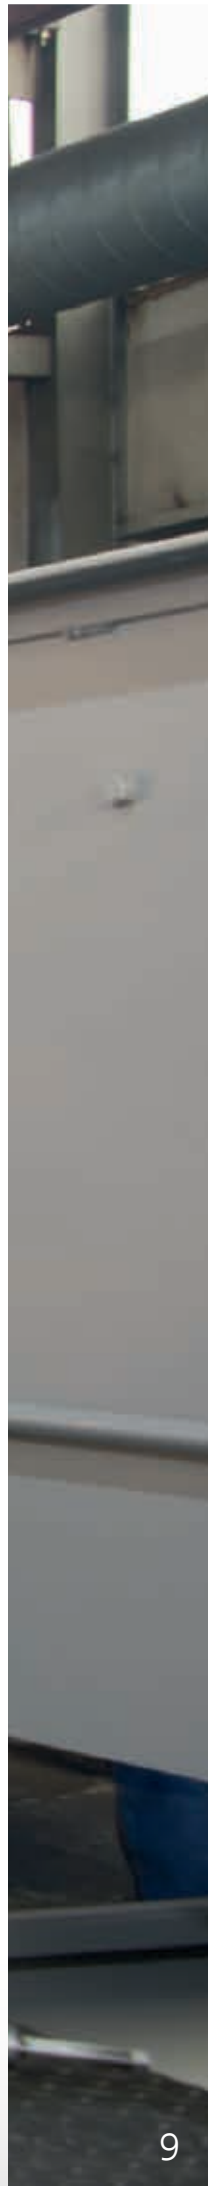

2012

We celebrate the fourth Innovation award.

2014

Resumption of twin-shaft shredder production.

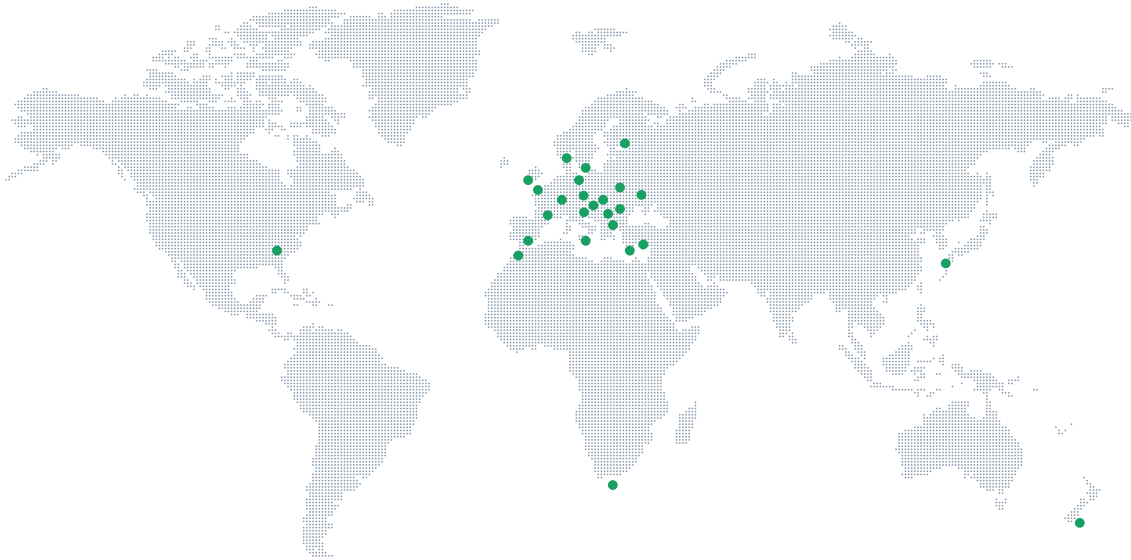

DISTRIBUTION PARTNERS

in Austria, Slovakia, Finland, France, Hungary, Slovenia, Denmark, Czech Republic, Germany, Sweden, Norway, Italy, Spain, Lithuania, Portugal, Turkey, Greece, Romania, Great Britain, USA, Belgium, Switzerland, South Korea, South Africa, New Zealand.

We constantly work on the expansion of our distribution network.

"Love for details and a desire to develop and build high-quality products have been with our family company for decades. We know that our customers love the extraordinary in the matter of quality, performance and reliability.

For this reason, we see your interest in our products as a personal mission.

Experience the high quality and benefits of our machines at the facilities of one of our distribution partners."

Andreas Wagner
Managing director, CEO

Alexander Wagner
Head of production, CTO

THE BETTER SHREDDER

"We've been working for years with Wagner shredders and tire presses. Each product is state of the art in the matter of performance, speed and quality."

Roland Kohl, Managing Director Kohl-Eisen Ltd.

"We've been using our single shaft shredder since 12 years. Quality and robustness are unique. Our shredder runs and runs and runs ..."

Hartai Zoltán, Head of Department, Inter-Metal Recycling Kft.

"Wagner engineered and built an individual machine for our special requirements (bale breaker). The intuitive operation, the performance and functionality impressed us right from the start."

Philippe Kruschitz, Operations manager Kruschitz Plastics & Recycling Ltd.

"Wagner Shredder. Nothing else."

Jeremy Lindop, Managing Director Specialist Metal Services Ltd.
